

Lorenzo Catalano

JUNIOR DEVELOPER

Profile

Recently graduated from UCLL where I studied applied computer science. My main focus is on full stack web development (React and NodeJS/ExpressJS), but system development is not a problem for me.

I work well in a team and like taking on new challenges. My recent internship as a web- & mobile application developer at MyGamePlan.ai learned me to work together and create the best possible products. I also learned to talk with customers and sell myself or products at my vacation job as a salesman at Blokker.

Internships

Junior web- & mobile app developer, MyGamePlan.ai

MARCH 2022 – AUGUST 2022

Mobile application with React Native
